THIHA LIN

Front-End Developer Co-op | CNXDevSoft

Portfolio: Thomas D. Lynn | 6631503092@lamduan.mfu.ac.th | thomasdlynn.dev
github.com/Thiha-Lynn | linkedin.com/in/thiha-lin-0152b6345

React/TypeScript platform developer seeking CNXDevSoft's Front-End Developer internship. Connects responsive interfaces to APIs and business rules, with experience across commerce, logistics and educational dashboards. Brings client requirements work, cross-platform integration and documented handover.

Technology learning and project building since 2019; Apple App Store and Google Play experience since 2022.

EDUCATION & PLACEMENT

Mae Fah Luang University | B.Eng. Software Engineering | 2023-present

GPAX 3.53 through semester 2, AY2025. Co-op availability: January-May 2027; available throughout Thailand.
Expected graduation: approximately June 2027

TECHNICAL SKILLS

JavaScript / TypeScript, PHP, Python, SQL, Dart; React / Next.js, Vue / Nuxt, Laravel / Filament, Node.js / Express, Flutter; MySQL, PostgreSQL, SQLite; Git.

Applied AI: LLM integration, keyword-based RAG, prompt engineering, human review and agent-assisted development. Myo Taw case study. **Credentials:** CLLMSP / CLLMSE (Red Team Leaders).

PROJECT EXPERIENCE

Role focus: JavaScript/TypeScript, React, API integration, responsive interfaces and clear progress communication.

Consistency and data integrity | Campus One

React / TypeScript, Node.js / Express, PostgreSQL, PGlite, Flutter, Caddy | Case study

- Independent capstone using React/TypeScript, Express, PostgreSQL/PGlite and Flutter. Registration design uses transactions, row locks, idempotency and audit records. Public demonstration uses synthetic data; it is not an official MFU service.

Welmal | WEL MAL COMPANY LIMITED

Laravel, Blade / Vue, React / TypeScript, Java Android, Swift UIKit | Case study

- Sole developer for connected storefront, admin and native customer-app implementation around a shared Laravel API; ongoing client engagement.

- Worked across localization, catalog/order journeys and API parity; native porting and integration include AI-assisted development.

Golden Gate GGT | Chiang Mai logistics

Next.js / React, Node.js, Laravel, Flutter, SQLite, AWS | Case study

- Sole developer for the client logistics platform: public site, shipment API, browser workspaces and staff/customer/courier applications.

- Parcel QR labels, custody handovers and delivery evidence are supported by role-boundary, audit and retry-safety checks; operational pilot.

SOM BI | MFU School of Management | Vanguard team

Nuxt / Vue, Express, MySQL, Firebase Auth, Chart.js | Case study

- Contributed to implementation, E-port KPI integration, internal setup and deployment of administrator/lecturer dashboards.

- Connected program mapping and evaluation-period analytics; source includes user-scoped KPI caching, request deduplication and timeout handling.

ENGINEERING DEPTH & CLIENT RESPONSIBILITY

ONGOING CLIENT DELIVERY

Independent client-platform developer supporting **WEL MAL COMPANY LIMITED (Myanmar)**, **MSCT PTE. LTD. (Singapore)** and **GOLDEN GATE GGT COMPANY LIMITED (Thailand)** through business discovery, solution design, web/mobile implementation and continued support. Practical Apple App Store / Google Play experience since 2022; coordinate D-U-N-S-related organization onboarding, Apple / Google Play developer-account administration, release preparation and app-review responses.

LLM SECURITY CERTIFICATIONS

Certified LLM Security Professional (CLLMSP) | Red Team Leaders | 16 Oct 2026

Certified LLM Security Expert (CLLMSE) | Red Team Leaders | 16 Oct 2026

Coursework: LLM fundamentals, inference/tokenization, RAG versus fine-tuning; secure agent architecture, ReAct/multi-agent concepts, MCP, tool permissions and human-in-the-loop controls; OWASP LLM risks, threat modeling and AI governance.

AI / AGENT-ASSISTED DEVELOPMENT

Use context-rich AI workflows for codebase analysis, task decomposition, migration and cross-platform implementation. My engineering account covers Claude-assisted PHP-to-Node.js migration, Laravel modernization and native porting. Existing behavior, API contracts and regression checks guide review.

ADDITIONAL ENGINEERING EVIDENCE

LLM integration and RAG | Myo Taw News | Case study

Implemented Gemini/DeepSeek translation and RAG reply drafting using keyword knowledge retrieval and article context. Includes usage accounting, output checks and review controls. Laravel / Filament / PHP; retrieval quality not yet benchmarked.

Consistency and data integrity | Campus One | Case study

Independent capstone using React/TypeScript, Express, PostgreSQL/PGlite and Flutter. Registration design uses transactions, row locks, idempotency and audit records. Public demonstration uses synthetic data; it is not an official MFU service.

Media-platform engineering | Actually We ARe MAd | Case study

Platform implementation combines Next.js, Prisma/PostgreSQL, FFmpeg transcoding, HLS playback and Telegram operations. Creative media remains credited to the AWAM community.

Python and tooling | Myanmar Glyph Studio | Case study

Built a browser drawing studio and Python/UFO/fontmake pipeline connected through portable project JSON, with OpenType shaping and cross-engine validation tooling.

Multiplayer and collaboration | End Game Union | Case study

Game development with Backbenchers Studio and fellow developers using Unity, C# and Photon. Work spans multiplayer and the wider ecosystem; the next relaunch remains in preparation.

COLLABORATION & DELIVERY

Requirements and client communication: Translate business problems into merchant, buyer, courier and staff workflows; maintain ongoing client relationships.

Ownership and technical communication: Connect implementation, release coordination and support; document requirements, architecture, testing and handover.

Team collaboration: Vanguard contribution to SOM BI and End Game Union work with fellow developers; retain original creator credits.

Cross-domain problem solving: Commerce, logistics, institutional analytics, education, media, games and developer tools; translate unfamiliar business rules into software workflows.

ACADEMIC FOUNDATION

Computer Programming (A); Object Oriented Design and Programming (A); Software Construction and Evolution (A); Database Systems (B+).

Engineering emphasis: explicit data contracts, authorization, transactions, retry safety, caching, regression checks and documented release readiness.

COMPLETE PROJECT INVENTORY

All 33 documented portfolio projects. Each project name links to its case study, contribution and credits. Full-stack systems, team work, open-source tools and credited adaptations are distinguished below.

End Game Union [team; relaunch pending] - Unity, C#, Photon, Android / iOS

BurmaMart [MSCT, Singapore] - Laravel, PHP, Filament, Sanctum, Flutter / Dart, MySQL

Golden Gate GGT [pilot] - Next.js / React, Node.js, Laravel, Flutter / Dart, SQLite, AWS

Actually We ARe MAd - Next.js / TypeScript, Prisma, PostgreSQL, FFmpeg / HLS, Telegram

STRIKERS - Laravel, PHP, SQLite, JavaScript, API-Football

Myanmar Glyph Studio - JavaScript, Python, OpenType, fontmake, PWA

Myo Taw News - Laravel, Filament, PHP, Gemini / DeepSeek APIs, LLM translation, Keyword-based RAG

DK Gaming Shop - Next.js, Provider APIs, Python, Telegram, Mobile

Welmal [ongoing] - Laravel, PHP, Blade / Vue, React / TypeScript, Java / Android, Swift / UIKit, MySQL, Redis

Hledan Junction - Three.js, WebGL, Lighting & weather, Mobile optimization

SOM BI [team] - Nuxt / Vue, Node.js / Express, MySQL, Firebase Auth, Chart.js

EXTANT - HTML / CSS, JavaScript, Music & video

Nyan Production - Astro, JavaScript, Lenis, Video optimization

Yoon Nadi Htet - HTML / CSS, JavaScript, Responsive design

Hein Zaw Fitness - React, Vite, Framer Motion, Lenis

Phyoe Dhana - HTML / CSS, JavaScript, Media storytelling

Lynn Khar - Web development, Telegram, Messenger, Workflow automation

MSCT PTE LTD - HTML / CSS, JavaScript, Corporate web

EPST [limited brief] - Personal portfolio

Thakhin Gyi - a satire - HTML / CSS, JavaScript, Satirical design

Phaung's Beauty Lab [demo] - Vite, JavaScript, CSS, Netlify

Elbaf: The Under-Realm - React Three Fiber, Rapier, Procedural rigging

Onigashima: The Raid - React Three Fiber, WebGL, Water shaders

Grand Line Fizz [adaptation] - Next.js, React Three Fiber, GSAP, Three.js

Sage Mode Awakening [adaptation] - GSAP, Canvas, JavaScript

Domain Expansion [adaptation] - GSAP, Canvas, Parallax

UniLab - JavaScript, Web APIs, Electron, Capacitor, OCR, FFmpeg

ESC Chinese | Chinese Studio - React, TypeScript, PWA, Electron, Capacitor

BackBenchers Academy - React, TypeScript, Vite, React Three Fiber, Python, PWA

Mahar Yangon Teashop - HTML, CSS, JavaScript, WebP, GitHub Pages

Thakhin OS - Debian 12, Shell, XFCE, live-build, Calamares

Campus One | MFU REG [independent capstone] - React / TypeScript, Node.js / Express, PostgreSQL, PGlite, Flutter, Caddy

Backbenchers Studio - HTML / CSS, JavaScript, Python, GitHub Pages

Complete project index: thomasdlynn.dev/#projects

Hledan: original map by Madric A. Grand Line Fizz, Sage Mode Awakening and Domain Expansion retain original showcase credits. MSCT corporate web and BurmaMart are related deliverables. EPST is limited to the supplied brief.
