Professional summary

I'm Thiha Lin, also known as Thomas D. Lynn, a Software Engineering student at Mae Fah Luang University and founder of Backbenchers Studio. I build complete digital products across web, backend, mobile and operational tools, using AI-assisted development alongside practical software engineering.

I currently support WEL MAL COMPANY LIMITED in Myanmar, MSCT PTE. LTD. in Singapore, and GOLDEN GATE GGT COMPANY LIMITED in Thailand. My work starts with listening to business problems, then connects requirements, architecture, implementation, release coordination and ongoing support.

My 33 documented projects span commerce, logistics, institutional analytics, media, education, games and creative tooling. Project stories identify my contributions, collaborators, release status and original creator credits.

Education & cooperative placement

Mae Fah Luang University · B.Eng. Software Engineering · 2023-present. Recorded GPAX: 3.53 through semester 2, academic year 2025.

Available for cooperative education January-May 2027, anywhere in Thailand, including Chiang Mai. Expected graduation: approximately June 2027. Exact placement dates to be agreed.

LLM security certifications

Certified LLM Security Professional (CLLMSP) - Red Team Leaders, 16 October 2026.

Certified LLM Security Expert (CLLMSE) - Red Team Leaders, 16 October 2026.

Coursework covers LLM fundamentals, inference and tokenization, RAG versus fine-tuning, secure agent architecture, ReAct and multi-agent concepts, MCP, tool permissions and human-in-the-loop controls. Security topics include OWASP LLM risks, prompt-injection defense, threat modeling, governance and monitoring. These are areas of study; practical project experience is described separately.

Applied AI & agent-assisted engineering

Myo Taw News : implemented Gemini / DeepSeek translation and retrieval-augmented generation (RAG) for reply drafting. The workflow retrieves active knowledge entries by keywords or uses related article context, then supplies that context to the LLM. It includes output checks, usage accounting and review controls; production retrieval quality has not been benchmarked.

Engineering notes : context-rich, agent-assisted codebase analysis, task decomposition, migration and native porting, guided by API contracts and regression review.

Complete project index: thomasdlynn.dev/#projects

Ongoing client delivery & release coordination

WEL MAL COMPANY LIMITED · Myanmar - commerce platform and native shopping clients. MSCT PTE. LTD. · Singapore - BurmaMart's commerce ecosystem and company website. GOLDEN GATE GGT COMPANY LIMITED · Thailand - parcel and logistics workflows.

Translate business needs into web/mobile products, shared APIs, databases and administration. Support organization verification and D-U-N-S-related onboarding, developer-account setup and administration, signing / distribution preparation, app-store review coordination, handover and ongoing improvements.

Independent client engagements through Backbenchers Studio, with continued implementation and support.

Technical skills

Web and backend: JavaScript, TypeScript, PHP; React / Next.js, Vue / Nuxt, Node.js / Express, Laravel / Filament; REST APIs, shared business rules and administration.

Mobile and games: Flutter / Dart; Android / Java; AI-assisted Swift / UIKit porting and integration; Unity / C# / Photon.

Data and reliability: SQL, MySQL, PostgreSQL, SQLite; relational modeling, transactions, row locks, idempotency, role-based access, scoped caching, retry workers and regression checks.

AI and LLM applications: LLM API integration, retrieval-augmented generation (RAG) with keyword knowledge retrieval and article context, prompt engineering, multilingual output checks, token-usage accounting and human review; agent-assisted software development.

LLM security learning: Secure RAG and agent architecture, Model Context Protocol (MCP), tool authorization, human-in-the-loop controls, prompt-injection defense, OWASP LLM risks, threat modeling and AI governance; CLLMSP / CLLMSE coursework.

Platforms and delivery: Git / GitHub, Linux / Nginx, AWS deployment context, release documentation, developer-account administration, D-U-N-S-related organization onboarding and app-store review coordination.

Creative and accessible interfaces: Python tooling, OpenType / fontmake, FFmpeg / HLS, Three.js / React Three Fiber / GSAP, responsive and multilingual UI, PWA and offline workflows.

Selected project experience

Independent practice · Backbenchers Studio

End Game Union

Game development

Developed the multiplayer game and wider ecosystem with Backbenchers Studio and fellow developers. Contributing to the next chapter, Reloaded, with multiplayer, progression, and the supporting web experience.

Unity · C# · Photon · Android / iOS

Golden Gate GGT

Delivery & shipping

Full-stack logistics platform implementation: the public website, shared shipment API, Laravel web workspaces, and Flutter staff, customer, and courier applications. Ongoing client support from business requirements and solution design through implementation, developer-account administration, release coordination and maintenance. QR parcel identities, handovers, audit records and retry-safe operations support the logistics workflow.

Next.js / React · Node.js · Laravel · Flutter / Dart · SQLite · AWS

BurmaMart

Commerce · MSCT PTE LTD

Implementation across the storefront, shared backend, administration, buyer app, and merchant app for MSCT PTE LTD. Ongoing client support from business requirements and solution design through implementation, developer-account administration, release coordination and maintenance. Shared checkout rules and currency consistency connect preview and order creation.

Laravel / PHP · Filament · Sanctum · Flutter / Dart · MySQL

Actually We ARe MAd

Media platform · Domain Lab Ltd

Built the public platform, media processing, administrative tools, mobile surfaces, and Telegram workflows for a Myanmar creator ecosystem.

Next.js · PostgreSQL · FFmpeg / HLS · Telegram

STRIKERS

Football platform

Designed and implemented a bilingual football portal with match browsing, editorial publishing, and cached provider data with visible freshness indicators.

Laravel · PHP · SQLite · JavaScript · API-Football

Myanmar Glyph Studio

Open-source creative tools

Built a browser drawing experience and font-generation pipeline connecting portable Myanmar glyph projects to installable fonts.

JavaScript · Python · OpenType · fontmake · PWA

Academic project

SOM BI · Mae Fah Luang University, School of Management

Vanguard senior-project team contribution: role-based KPI dashboards, university-system integration, internal setup, and deployment.

Nuxt / Vue · Express · MySQL · Firebase Auth · Chart.js

The complete project ledger

The rest of the 33 documented projects. These notes describe my contribution; linked case studies include current status, collaborators, sources, and deeper context.

Myo Taw News

Platforms / Live publication

Backend and implementation for the news platform, editorial workflows and public reading experience, including Gemini / DeepSeek integration and keyword-based RAG reply drafting.

Laravel · Filament · PHP · Gemini / DeepSeek APIs · Media workflows · RAG / knowledge retrieval · Prompt engineering

DK Gaming Shop

Commerce / Web + mobile + bots

Full shop-system implementation spanning storefront, admin management, wholesaler integration, mobile apps, and Telegram operations.

Next.js · Provider APIs · Python · Telegram · Mobile

Welmal

Commerce / Ongoing support · Android listed on Google Play

Commerce implementation across the web experience, backend and admin tools, plus customer mobile applications. Ongoing client support from business requirements and solution design through implementation, developer-account administration, release coordination and maintenance.

Laravel / PHP · Blade / Vue · React / TypeScript · Java / Android · Swift / UIKit · MySQL · Redis

Hledan Junction

Immersive / Playable · tribute

Web rendering and interaction: adapting the map for the browser, lighting, weather, navigation, and performance work for phones and laptops.

Three.js · WebGL · Lighting & weather · Mobile optimization

EXTANT

People & Culture / Ongoing project

Ongoing band-site design and implementation, shaping music, imagery, release information, and contact into one immersive experience.

HTML / CSS · JavaScript · Music & video

Nyan Production

People & Culture / Portfolio

Portfolio design and implementation, video-first presentation, filtering, and media delivery decisions.

Astro · JavaScript · Lenis · Video optimization

Yoon Nadi Htet

People & Culture / Portfolio

Personal portfolio website with an education-focused story, teaching gallery, and accessible contact path.

HTML / CSS · JavaScript · Responsive design

Hein Zaw Fitness

People & Culture / Portfolio

Fitness portfolio design and frontend implementation, with scroll-linked motion and reusable content sections.

React · Vite · Framer Motion · Lenis

Phyoe Dhana

People & Culture / Portfolio

Website design and implementation around the filmmaker's existing body of work and public story.

HTML / CSS · JavaScript · Media storytelling

Lynn Khar

People & Culture / Website + ordering workflows

Author website and supporting book pre-order automation through Telegram and Messenger.

Web development · Telegram · Messenger · Workflow automation

MSCT PTE LTD

Commerce / Company website

Corporate website implementation and ongoing support for MSCT PTE. LTD., Singapore; connects its import and distribution business to the BurmaMart commerce platform.

HTML / CSS · JavaScript · Corporate web

EPST

People & Culture / Portfolio · link unavailable

Portfolio website project, as supplied by the project owner. Detailed features and academic claims are intentionally left unasserted until the source can be reviewed.

Personal portfolio

Thakhin Gyi - a satire

People & Culture / Satirical web experiment

Satirical website implementation, character-driven presentation, interactive sections, and visual storytelling.

HTML / CSS · JavaScript · Satirical design

Phaung's Beauty Lab

Commerce / Demo / sample

Demo storefront design and implementation for perfume discovery and listing.

Vite · JavaScript · CSS · Netlify

Elbaf: The Under-Realm

Immersive / Playable fan project

Interactive browser experience, scene composition, procedural character work, and keyboard/touch interaction.

React Three Fiber · Rapier · Procedural rigging

Onigashima: The Raid

Immersive / Playable fan project

Interactive scene development, environmental composition, water rendering, and navigable experiences.

React Three Fiber · WebGL · Water shaders

Grand Line Fizz

Immersive / Adaptation & extension

Adaptation and extension of the credited 3D base project: character cans, content, scene work, interaction, and static deployment.

Next.js · React Three Fiber · GSAP · Three.js

Sage Mode Awakening

Immersive / Adaptation & optimization

Integration, presentation, and immersive-web adaptation of a credited original showcase.

GSAP · Canvas · JavaScript

Domain Expansion

Immersive / Adaptation & optimization

Integration, presentation, and immersive-web adaptation of a credited original showcase.

GSAP · Canvas · Parallax

UniLab

Tools / Live · open source

Built the web tools and cross-platform packaging around local file processing and offline use.

JavaScript · Web APIs · Electron · Capacitor · OCR · FFmpeg

ESC Chinese · Chinese Studio

Platforms / Live · open source

Developed the learning interface, practice flows, local progress, offline packs, and cross-platform releases.

React · TypeScript · PWA · Electron · Capacitor

BackBenchers Academy

Platforms / Open source · early platform

Built the textbook indexing pipeline and the immersive learning site, with Unicode Burmese and a 2D mode for lower-powered devices.

React · TypeScript · Vite · React Three Fiber · Python · PWA

Mahar Yangon Teashop

People & Culture / Live · open source

Designed and developed the responsive website, visual storytelling, and interactive tea guide.

HTML · CSS · JavaScript · WebP · GitHub Pages

Thakhin OS

Tools / Open source · community edition

Linux distribution customization and community-themed experience, presented alongside the public build source.

Debian 12 · Shell · XFCE · live-build · Calamares

Campus One · MFU REG

Platforms / Live · independent capstone

Built the connected application, registrar workflows, responsive interfaces, and shared backend for the web and mobile experiences.

React · TypeScript · Node.js · PostgreSQL · PGlite · Flutter

Backbenchers Studio

Tools / This portfolio

Studio founder and software developer. The original logo identity was created by our logo designer.

HTML / CSS · JavaScript · Python · GitHub Pages

How I approach a build

Requirements discovery and business translation. Ongoing client work starts with business problems and maps them to merchant, buyer, courier and staff workflows.

Client communication and follow-through. Ongoing support for three companies across Thailand, Myanmar and Singapore; coordination through onboarding, implementation and release preparation.

Ownership and prioritization. Connects interfaces, APIs, data and operations; tracks dependencies, pending approvals and release readiness.

Technical communication. Requirements, architecture notes, handover documentation and QA guides in reviewed projects.

Team collaboration. Vanguard contribution to SOM BI and End Game Union work with fellow developers; original creator credits retained.

Problem solving and adaptability. Cross-platform migrations, checkout consistency, role-boundary regressions and multilingual / offline experience across domains.

Hledan is especially personal: my friend Madric A made the original map of this little piece of Yangon. My contribution brings it to the browser through lighting, weather, navigation, and performance work. His authorship remains part of the experience.

The next chapter

My work sits where useful products and expressive experiences meet. Explore the project stories for implementation details, browse my public code on GitHub , or reach me at 6631503092@lamduan.mfu.ac.th to discuss a build.
